

## Methodology:

welcome all traders..

first things is respect others traders opinion or views here

feel free so can posting any pairs that can share with others traders here...

1st i add here for the set up of my trading method

ok..settle set up,now we go to 2nd rules for its..

2-how to know or tracking when shoulds we enter for buy/sell..?

first for MA 5 high (red)

we must see if the MA 5(high) going outside top BB

if that happen so we can be ready for our sell set up..

second for MA 5 low (yellow)

also we must see if the MA 5 (yellow) going outside lower BB,if that happens so we can ready for buy set up

its a early sign,not valid for any action yet...

but market always tricky,sometimes those MA 5(high/low) not going outside but the set up still valid.its happen 2 years behind now..

3-now we start for sell set up..

after MA 5 high going outside BB so we need to wait 1st bear cs to forming then we need a bull cs to test again at highest level before price to start reverse..

our entry is when price start to retest or trying to going higher again..so we wait to sell at the nearest resistance level..

4-for buy set up..

after MA 5 low going outside BB then we wait for a bull cs to forming and then wait for bear cs to retest or going for lowest level again.so we wait at nearest support to buy..

i will add some of example so you all can try to understand its..

for target..

usually if the set up came from small time frame like m15/30 i take for 20-40pips

if set up came from h1/4,daily i will target for big

and from weekly or montly so more bigger target and long term trading i'll set up..

risk..

usually at every of my entry i'm risk stop loss about 20-35pips,its depends from what time frame i spot its..

remember..wait price n cs to complete first then wait its retest,after that we got our entry..

# patience is the key for success #

Akim S&R levels are based on each time frame? ... or u focus in one time frame for main S&R and then trade it in the time frame wich gives the setup? I mean if u want to take a m30 setup u look at m30 S&R levels and if u want to do it in...let say daily u focus on daily S&R levels.

take S/R from which tF give you setup mate ☕🔥

{quote} the main problem is.. why Gu n Gj spike to the upside 🤔 that make me and navk shorting till die 🤔🤔🤔🤔

simple.

Have seen over the years... the price will hit either s1 or r1 in daily for sure.

today the price was always above pivot it never touched s1 and there was a good possibility to touch r1 and it touched.

Attached Image (click to enlarge)

The chart displays the GBPUSD M5 timeframe. Key levels include: R1 Day at 1.28041, P Day at 1.28057, and S1 Day at 1.27479. The current price is 1.28791. The chart also shows a pivot point at 1.28065. The price is currently above the pivot point and has touched the R1 level.

# F

Hi akim.

I wanted to ask u something to know if im right with this.

After setting up all the MA & BB

We have to look for a candel stick pattern thats happen after the yellow &red goes outside from the BB.

The candle stick patter are based in 3 candles wich for buying must be :one bearish candle, one bulish and next one bearish again, there u have the trigger.

And for selling, one bullsh candle next bearish candle and next bullsh so there u will have ur trigger.

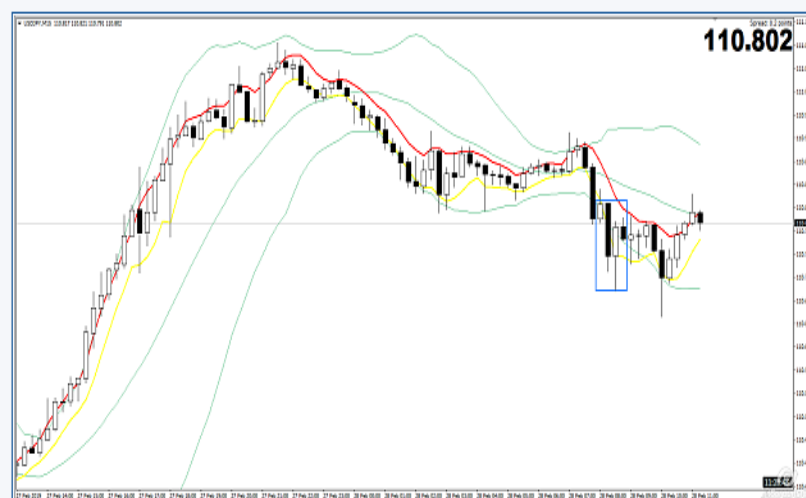

is that correct?

But all of this MUST HAPPEN AT SUPPORT & RESISTENCE AREA.

Is that correct? or i did not understand it correctly?

In this example we have the pattern at the correct point but we should need a S&R also to be a properly entry?

Attached Image (click to enlarge)

Thnks for the help

[jetScreenshot](#)

Hi again, I wanted to ask u something to know if im right with this. After setting up all the MA & BB we have to look for a candle stick pattern the yellow & red goes outside from the BB. The candle stick pattern are based in 3 candles with for buying must be : one bearish candle, or bearish again, there u have the trigger. And for selling, one bullish candle next bearish candle and next bullish so there u will have ur trigger. all of this MUST HAPPEN AT SUPPORT & RESISTANCE AREA. Is that...

Hai mate..

yes you're right..

usually its will happen at support n resistance area

as i mention at 1st page..we wait to trigger at nearest support and resistance...

because the retest candle its will try to push harder to upside/downside to trap buyer/seller before they reverse its..

i'll give more example later at current tF that happen today..

edit: some of action for today

you can see the setup forming, also i have told that have been couple years now market a little tricky..

setup forming inside BB and its still valid mate..

as long other rules is complete.. 🍀🍀

Akim0895, I have studied your trading system and I understand it well. However, There are a few times you have taken trades without price coming up/down for the second retest like you did earlier today with the GBPUSD as i marked in the attached image you shared. Also, you open 3 different positions, what strategy/calculation do you use with regards to risk management to determine if you should open more than one position for the signal/trigger. Thx

hai mate..

sometime when confident so i did jump early or take several position mate..

i also always watch dxy chart for more comformation what will i trigger

like what i do earlier at GU..

every of my trading i always put some stop mate,so i can control my loss if price not going as predict..

{quote} Akim, which pairs you trade and which ones you avoid. I am interested in your strategy but some questions. 1. Do you look at all time frames and wherever you find potential setup you place an pending order? 2. How do you determine TP and SL 3. Pairs you trade 4.Can you make a template of your system and post if that's OK.

usually i trades all pound pairs because i love the crazy momentum 🤔🤔🤔

gold,eu(sometime) because they too slow moving.

uCad(if have events or data) uChf,uJ,Nu,Au n some more cross pairs..

abouts setup/time frame..yes i look for sign/clue from all tF (from m15-daily or weekly) before i jump at any direction charts show..sometime i used pending order,sometimes i just jump in at support/resistence..

i'll set the template for my system

because i just used my phone to chat here 🍵🍵

[@jabarens101](#)

sometimes we need to search for nice setup from different tf..or also all tf will look very bearish or bullish but only small sign from one of tf of bulls or bears can change the trends just like that.

same what happens at early of last week n friday

when i spot a bulls cs for Gu..

i'll sticks too that setup till have cs close below the setup cs

if not..so i'll hold my entry as long my stop not hits 🙏🙏

also can see my friday setup for uCad,that i'm in 30min before data came out..

abouts tP n sL

if the setup came from m15-30 so just took 20-30pips

but depends on PA sometimes mate..m15/30 also can go to 50-100pips when PA are crazy..

if setup from bigger tF so we can target for big pips coming

sL..if small tF i'll set sL about 15-25pips

higher tF so i'll set abouts 25-40pips stop(they can go wild before reverse)

{quote} I meant this chart. In it the resistance w

Ohh..

i thinks GU

wrong,sorry mate

AU since late last night struggle to get back above 7100

so i took there from m15 setup mate

i also pending shorts that time till 7105

but price just test 7100 n reverse back down

if not there will be a jellyfish going down 🐼🐼🐼🐼🐼

ola mate..

it ok..

just 2 cents of method

i'm really sorry for your condition mate

in that kind of condition or pressure

we traders should not take that kinds of risk or pressure there..because we will get into more worst condition with a lots of pressure if got loss..

for some traders its will be bigs amount there

for some others just small amount..

but our feeling n emotional also count when decision to make for a long/short to be take..

however still got time there to do its mate

its depends too at your margin..

if i got spot any good setup as usual i'll drop at threads

take care mate 🙏🙏

{quote} Sir Kindly tell me PA and cs

price action that can learn by watching price reach at some support/resistance, how they play/reaction there..

my early study i write its all in my book

but when you trading/watch it all the time so its will be in our brain

CS you can search at google or books

that important for traders

the name of chandlesticks/pattern

that how we know what market telling us 🍵🍵

jetScreenshot

**akim0895**

that why if wanna play at asian session must have good setup before take its..

or just scalps will be fine

if not london will shaking us 🍵🍵

{quote} May i ask how can u appreciate that the pair is gonna still dropping? Is based in bigger time frames. Market structure, personal appreciation... Im asking for learning purpose, Thanks.

yes mate..  
for me almost 3 weeks now still at bears side  
from bigger tF still south mate  
especially..at weekly  
as long price trading below 3245  
i'll keep shorting Gu ☕

{quote} akim i have question here what to do when we have m30 saying to go down... and m15 is starting to form the opposite direction up? should i close it and take the opposite deal ...? or keep it till when ? what to do in these cases and do u use more indicator with ur methods? to make sure when to take tp and sl ? i close deal 20-30 pips..... and sometime trend go 60 and more how to calculate tp ?

sometime need to watch also big TF for direction mate  
small TF like m15/30 we make as an entry point or tP..  
tP depends how patience you are,because market not going in straight line..  
i only used BB n MA  
that all.. 🍷🍷

{quote} Hi mate. With ur method assuming the lower goes outside the BB then we prepare for a position. My question is how do we know if it will reverse like this one you are saying now that GBP/usd will still come back. Also I just want to be clear about your method. Assuming we want to sell, we wait for the upper MA to cross the BB the we wait for a bear cs then a bull cs to retrace RIGHT?

that right mate about setup..

for Gu or others gbp pairs i took a weekly tF as my bias

that why have been 3 week i play a lots of my time at bears side..

and small tF like m15/30 to enter the market..

@JetScreenshot

akim0895

at early stage of trading..

just keep its green,don't mind only 1 pips

important its green..

that how we can grow our confident and courage in future

{quote} AKIM 😊 Change your cruise ship direction to upside 😊 just for today. Daily chart setup is Bull 🚀

ha ha 😂😂

daily already bullish 2 day ago mate

but price still play in range

let see later

which way its break

i have both position for now

my main target still down 🍵🔪

@JetScreenshot

**akim0895**

*Quoting htcone*

Hello everyone. It's feel nice to be part of  
confused regarding candle positioning. For  
or which is just started (New running candle)

usually we see at higher tF for direction  
before see at small tF like m15/30 for an entry  
watch what happen to NZD there for example..  
that how i make an entry 🍵🔪📈

*Quoting AlexanderTan*

{quote} if Follow Akim set up for EU for H1 and M15 it should be bear for another 4 to 6 hours. for d1 it is bull. So which one

after a spike before have changing hand to bulls for a while there mate, maybe frankfurt or london will lead a clear direction later..

if want to sell better wait a setup come first

m15 is still fighting..

but eu is almost a dead pairs

only 25-35 adr.. 🍵🔪📈

jetScreenshot

[akim0895](#)

[Quoting issahayek](#)

{quote} Im still learning this method... can u explain why its a fail...?

at m15 there a bears setup n bulls push higher after 2 cs bears drop..that a fail setup..  
after go a little higher so rejection from above  
so if wanna sell wait from m30 if current cs close with bulls  
if not price may test above again.. ☕🔥

[akim0895](#)

[Quoting htcone](#)

{quote} I am new stills trying to learn. Is setup v

if you really still new so better just trading london session  
enough pips to make  
no need being greedy  
its still early to trades  
market just open  
better out and have a cup of coffee ☕🔥 @jaScreenShot

{quote} How many pair u trade akim? All of them in HTF only t GU going to m15 and m30? I'm curious about it cause u collect money every day every where lol...

about tF..  
sometimes when higher tF too bearish/bullish  
so we need to get a setup from lower tF..  
or lower tF too bearish/bullish so try to find a setup from higher tF..  
however lower tF give better entry..  
higher tF give what next direction  
remember one things...  
market will not give a clue too easy  
so need to find and wait for good pairs to trades ☕🔥

@jaScreenShot

[akim0895](#)

like UJ..  
almost a week now price dancing up n down at same place  
so better not to trades for now..  
just monitor and get another pairs to trading ☕🔥

Quoting ghussain

{quote} Today all setup fail {image}

some of trades you have taken couple day back

take as a lesson for future trading

some of your trades already in green before red

shoulds learn take small profit and reverse the trades

like EU there..

before news/data yesterday

clear a bears setup but you still hold and go against its

you have go against what charts telling you to 🤖📈

**akim0895**

Quoting ghussain

{quote} Today all setup fail {image}

GU..

main trend is 'down'

now already 4 weeks i'm sticks to bears side

however i still play at bulls side but only scalps for some coffee and out..

fly or rocket to upside...not yet

bears still not finish his job at downside

i see there you take fews trades at long side

every bounce is a reload for shorts not long yet 🤖📈

{quote} nice to hear that. I always see your chart. But now I see most of the time you break your 1st page rule. So if you have changed your trading style, you should make a change in the first page also. Or the newbies will be confused and will be asking you all the time 😊. I also enjoy your trading style though I am a swing trader. Take care. Enjoy your weekend 😊

ha ha 😊

nope mate

still stick to my 2 cents of method

only sometimes at some place of resist or support i placing some entry,but still follow from my rules..

when at dxy charts price wanna reverse so i just add to play at major pairs..or higher tF have the setup but smaller don't have,when reach at support or resist so i add some to scalps...or some more times,my entry already in play but the setup fail but my stop not hits so i just leave there to play or hit my stop.but price reverse back to my direction..

trading forex is like an art mate

sometimes need to thinks outside the box n take a risk but must put a stop for safety 🤖📈

@JasScreenShot

**akim0895**

*Quoting akim0895*

{quote} ha ha 😊 nope mate still stick to my 2 cents of method only sometimes rules.. when at dxy charts price wanna reverse so i just add to play at major pa resist so i add some to scalps...or some more times,my entry already in play bu stop.but price reverse back to my direction.....

also happen like yesterday at Gold..

h1 is forming bears setup

h4 is bulls setup

so i play scalps with h4 bulls setup

smaller tF more to bears,but it does react for 30min-1hour before reverse back down..

its always play like that when setup is mix from different tF

take some pips and out the market 🍵🔪

for newbie out there..

before start to watch charts moving up n down

find some book from greats traders and study first

that the 1st things to do,get to know as much as you can about chandlesticks pattern..

can't remember all the name its ok

but know what that kind of chandle forming for

its a bulls or bears side

its will help a lots when you start trading 🍵🔪

{quote} hi akim, if H4 candle bull, H1 and M30 bear Which timeframe you follow first, higher or smaller tf?

ola mate..

1st things i watch is where the price is trading

low,medium or high..

if low n near some support so i take h4 setup for bulls to play and wait price going a little higher than i reverse to m30/h1 to shorts its back down..

same what happen to gold yesterday mate ☕🔪

Akim S&R levels are based on each time frame? ... or u focus in one time frame for main S&R and then trade it in the time frame wich gives the setup? I mean if u want to take a m30 setup u look at m30 S&R levels and if u want to do it in...let say daily u focus on daily S&R levels.

take S/R from which tF give you setup mate ☕🔪

hrmmm...🤔

criticism is a normal in any biz or life bud

if don't want to hear any criticism so better do its quiet

only expose when target reach at your goal..

also depends how to absorb all that before target reach

and the criticism for me is nothing n normal..

always thinks positive

i'm facing much more at my early stage become a forex trader..

because the important things for me is how n what inside ourself

that much more matter..

when we want to do somethings big..

our mentality,confidence,patience n courage is must at 100% perfects..

when things we want to do need to take a long time to achives so..can all of that can always be at 100%...???

for example..

you still stick with your another job

not a full time traders

so sometimes pressure not come from your trading at forex but come from your other job..

that need more attention from what i see..

private life also matter in our way of success

how to keep things always be under control

so those things can't bother our emotional

just my 2 cents of opinion n GL bud ☕🔪

Hello mates. Please what does a tweezers top pattern mean in a downtrend market??

maybe a conformation that price will drop more i thinks

usually when market downtrend we need tweezer bottom for market to reverse to upside.. ☕🔥

[akim0895](#)

used a lots of broker is good for our future trading

we don't know sometimes broker will have some problem

now i used 4 different broker

still looking for more 😂😂😂

[akim0895](#)

[Quoting Tangilh](#)

{quote} I know mate, it will come later... but eat some experience..

that a normal things in forex

everybody have the same situation

i'm also at past..

keep focus..

don't sell low n buy high

better miss a train than floating in red ☕🔥

@jetScreenshots

[akim0895](#)

sticks to what you see from your method/system

others let the market decide..

patience is the main key ☕🔥

[akim0895](#)

[Quoting Mtinifx](#)

{quote} Hi mate Don't worry, I think most of us I market is extremely volatile and it's difficult to trades in the wrong direction. Much bigger player

yes mate..

nobody is perfect in this biz

win or loss is a normal things in this biz

if win so always want more(greedy)

if loss then keep adding position and things gone worst

so main things is 'PATIENCE & EMOTIONAL'

control its and don't let its control we..

nice weekends ☕🔥

{quote} will be interesting weeks for GA n others aussie pairs

Hello mr akim, i hope u had a nice weekend and wish u a good Ramadan month.

I am still very impressed with what happen last week, how u stick to ur longs in GU and had the short view in DXY, even when the weekly candle was almost looking as a hammer, u was convinced of a red candle for dollar so u short dollar in all the crosses, even in gold, and stick to long in GU.

The thing is that i know u gonna tell me, it beacuse ur set-ups or just lucky mate lol...

But i will appreciate an honest answer of what made ur perspective or view so clear and focus on that. The moment u start with this view the set-ups wasnt there yet and the longs in GU u started from the bottom at 1.286xx levels and let it run in BE whole week. Not just scalp, so something build ur long-term view...

I had spend most of the weekend applying fibos,abcd pattern, Elliot waves, i dont know how many things i tried but of course with my knowledge and not with urs so i could not find the clear reasson behind that BIAS and that view u had.

I know u share a lot with us here on daily basis and not need to share more but i wanted to ask for learning porpouse cause i would like to get to ur level or at least have the mind focus in the way u do it.

Thnks for ur time and i hope i did not bother u with this long message.

thanks mate..

for the question you ask

i thinks you already answer its  
mate..

everythings is coming from experience  
sometimes those setup go like us want  
sometimes go against us..  
important..

sticks n confidence what you have learn n see from what happen at past..

1.286-87 already reject before mate

that why i start long from there when other still want to open shorts..

also the weekly setup from dxy that make me sticks to my Gu n gold long..

i trust my methods n i know somethings will came to shake the price..
