Hi guys

Just want to say its important you are passionate about trading and love it even when your performance does not exceed your expectation. As an artist sometimes I ruin 20 drawings to get one great one its same across lot of fields. Trading should be looked upon as creative process you are constantly being challenged by the market and adapt, overcome and succeed. Last week market humbled lot of egos and that's fine its important we respect it.

Don't ever feel discouraged **remember we love this! You keep pushing yourself!** 🚀🏍️🏍️🏍️🏍️🌱🏃 until it becomes muscle memory.

Anyone knows a site which shows present weekend prices? Please post the link if you find it

like to see if there are gaps

I suspect UC 3380 open or lower after death of virus in US and Feds statement I think USD dumping may start taking shape.

By 8pm should decline a lot. Looks like this was the reaction of Chinese Sat red data.

Got no margin... EN wow hit 78 dropping quick. Serious corrections are waiting on E crosses be patient!

My wife drugged me to tango dance lesson today and last one at that!. It was pretty awkward not enough females so we needed to change partners and instructor kept telling us to hug our partners and two were males 😂😂 Weird

Told my wife find somebody else to go with...

Women always want to do things with boyfriends or husbands... I promised to cycle with her instead of tango. I think she went for it.

guys lets not get carried away. March 18th is little over 2 weeks away and rate cut is certain now since USD dominance is creating global stress.

Watch the PA

It was not distant past when everyone was screaming parity with Euro well it never got there!

I maybe mistaken but **rate cut on AUD tomorrow has been priced in.**

Had a asshole post vile comment PM me **because one of the post I was wrong on a trade**😂

Insisted I change my post. Which I did not!Every trade is based on probabilities I could be right or wrong so I could go 10 trades in a row winners or losers hence taking anyone's trade as your own without understanding nature of probabilities is your own responsibility.That goes for other peoples opinions including mine.

You own your trades

I dont claim I know better then anyone what I do.I shared how I trade and if you find it profitable then that's fine if not you have millions options.

rate cuts= STUPIDITY The Fed just created a delayed recession or depression. Hopefully I will be proven wrong , but , tell me I'm wrong 2 years from today. STUPID !!!! Regards , GE

It was the right decision.Wall Street needs some confidence measures unless you want to see millions of middle class and poor lose all their pensions 401k gains
Rates can put back higher once economy picks up.

You should look Carter's era when it shot up to 18% it was a disaster! Reality is nobody puts money in the bank anymore to earn interest.That's not where it gets parked but in mutual funds stocks treasuries.Hence lower interest rates rejuvenates big ticket buying like houses cars which generate growth in related industries.

Life begins at the end of your comfort zon

Personally , I...

You dont really think professionals with years of experience with top degrees in economics are haphazardly lowering rates? Seriously this was the right move. Stop listening so called "experts" on TV less you listen their chatter the better. That goes for politics, Trading as well. Biden who didn't set foot in my home state Massachusetts won the state beating Elizabeth Warren her state! That nobody saw it coming! Goes to show filter as much noise as possible

[Armenia's 5-star care for quarantined citizens makes global headlines](#)

YEREVAN, MARCH 3, ARMENPRESS. Posh suites and a luxury hotel – these are the conditions that the Armenian authorities have provided for the 32 quarantined direct contacts of the first novel coronavirus patient. The direct contacts are quarantined at the Tsakhkadzor resort town's previously defunct Golden Palace five-star hotel.

PM Nikol Pashinyan had earlier said that those quarantined must be treated **"like we would like our families to be treated"** in such cases, and noted that the quarantined citizens will receive dignified conditions.

And this move has already received global attention.

"Being quarantined on suspicion of carrying a deadly contagious disease is quite an ordeal, but at least Armenia is making up for the hassle by placing coronavirus patients in a 5-star hotel", writes RT.

"In some countries, repatriated coronavirus patients are met with stones and threats, but in Armenia, they have so far received drastically different treatment", the news agency wrote, posting the video shared by PM Nikol Pashinyan showing hazmat personnel handing out meals to the people in the luxury hotel suits.

The Turkish NTV has also touched upon Armenia's quarantine conditions, emphasizing that the Armenian premier has ordered a five-star quarantine condition for the persons.

Armenia reported its first novel coronavirus case on March 1. The virus was confirmed in an Armenian man who traveled to Iran. He was hospitalized in Yerevan, while his direct contacts were taken to the Tsakhkadzor resort town's previously defunct Golden Palace hotel. The hotel was quickly re-launched by healthcare authorities and the quarantined people have all necessary conditions, including food service, internet etc.

Makes me proud being Armenian American

Just for background **Nikol Pashinyan PM is former rebel journalist after fighting years against oligarchs and corrupt politicians won the election. Armenia since then sky rocketed up on all fields.**

Hi guys

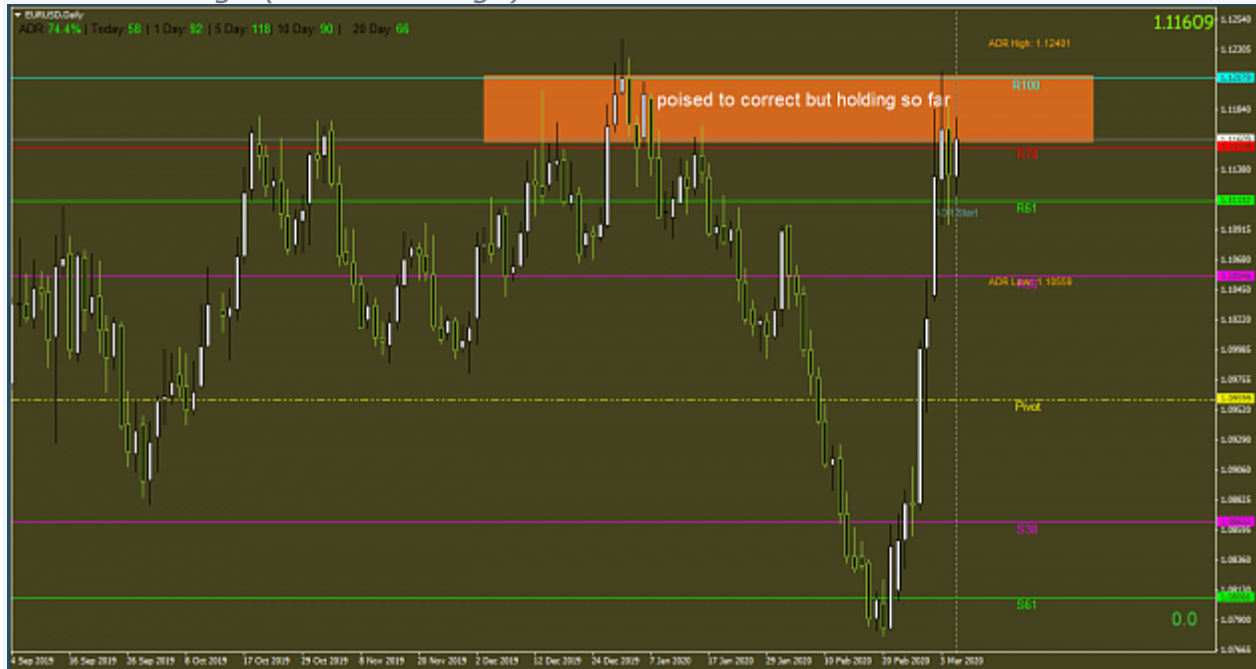

Euro amazingly going up despite of all the bad news which amazes me

how much banks control everything. Italy is shot down basically and Euro going up despite of it.

CAD If Russia agree on oil cut CAD should gain and looks like Russians will agree with OPEC cut unless they want to sell oil at 25 a barrel or less

Crappy situation overall.

Quoting artestine

This is when Eur pairs could start to collapse. ECB must do something if it doesn't want to implode. Italy is on its knees. Germany, France and Spain are starting to have damages. Italy is losing an approximate of 10+ billion in tourism revenues only for March-May period. In a week this can be worse, also in the other States. I expect a massive intervention of ECB. If it doesn't intervene heavily everything will slip away from it. {image}

at zero rate what else they can do other then go BOJ direction
negative interest
so far they are reluctant to do but may be forced
EC is looking great

hi guys
obviously the panic of Covid19 is skewing the markets to irrational extremes.
Equities were heavy sold off and money went into safe heaven ATM Euro.
We need to weather the storm until things become more or less normal.
Should ECB drop a bomb over the weekend that would be nice. This is like last summer Trump trade war on China only difference end is questionable on this one.

If you must take losses then you must. Have troops left for another day. It's a marathon not a sprint.

People who judge a system based on this current situation are delusional. For every loss I can show you hundreds of winners. That's that for my critics!

As a side note as situation becomes more critical in Italy and Euro appreciating greater heights I think ECB most likely will interfere. Last thing they want super strong Euro competing with the rest of central banks already started cutting cycles.

Feds may follow more cuts

Should ECB go -.25 or even -.75 like Swissy we can see serious drop on all Euro pairs

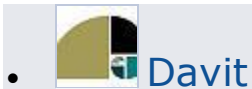

Generally positions are not kept long term when big banks shelter money on Euro since they are paying swap hence don't think this is sustainable even without ECB cuts. On slightest good news funds will run away from the Euro as quickly as it came to it.

Hi guys

Latest development on oil crises is not looking good for CAD

I am prepared to close all positions as loss and wait until it gets pushed to extreme. 1.38-1.40 not ruled out.

Slashing prices by Saudis and Russia and with virus halting transportation and reducing consumption is worst case scenario. Talk about making shit situation even more by Saudis threatening to increase production to 12 million a day. Anyway thought to post this in case you are not aware of latest news. I just hope gap on UC is not huge...

Best case scenario take the loss now (your decision) then once goes 1.36+ I think will go higher then shorting then coming back to now you'll break even and even profit more below it.

Saudis can afford to sell it with loss not sure on others. US oil producers need above 40 to make profit. This has larger implication Saudis may want to destroy all competition by forcing bankruptcy of other producers specially US which is largest producer now.

I guess Trump friends may have given him the ultimate finger more like a tree log

Short EC 5530-55 xxxx

Stay focused lot of extreme positions if you play it right you'll get some of your losses back. You may have to go bigger than your average %. Not everyday you get such prices. I made 180% last trade. Yes that's correct! Had to do some calculations. Expecting a Euro crash after ECB may happen even before.

Hi guys

I want to apologize for everyone who lost money. I lost good chunk of it myself. Lot of people did.

You'll read BS posts about me "revenge trading" etc. The usual crap. Fact is I am my own indicator and I am going to trade as I see fit me. Not anyone's standard.

All I can say even 5k account can be grown very quickly. Don't give up. You are a lion inside and you'll die like one. No place for weaklings. This is trading and comes with territory.

Wish you the best! 🦊

Quoting Egbert

{quote} You are on 🔥🍺🍺👉 EUR is sell the rumor and buy the news?

Thanks friend. Very focused. Euro IMO should collapse after ECB or even before it. Entire Country Italy on lock down talk about exhilarating recession. I think ECB may go negative rates.

Something "safe" is EG away from Asia banks spikes

Only issue it wont move until Thurs so your money will get locked down for 2 days and takes lot of margin other then that its solid trade. I need my money not seating. Need it to make more money seating kills time and Time is precious.

Closed EC decent gain

Reason to close I am expecting back up again and may short again at yellow support

Most likely range until ECB or could break south now. "anything can happen"

Attached Images (click to enlarge)

Symbol	High	Low	Open	Close	Day High	Day Low	Volume	Spread	Net Profit	Net Loss

{quote} Come on Davit, I've been following your thread for years and have great respect on you. You've burried a lot of time and effort to this thread which I think everyone highly appreciates including myself. My post was constructive criticism not some BS post about you but about your trading after suffering a loss. The reason was because after loss you were encouraging people to risk higher % so everyone could gain back what they lost. This is not what you've taught here, this is by all definitions "revenge trading" which almost every time leads...

You are correct I made the mistake of thinking loud.Sometimes I forget everyone is different level of development on their trading.

Please do what's in your best interest.

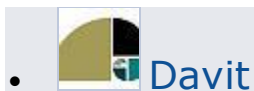

I trade obviously different then 4yrs ago.I have grown as a trader and along the way my appetite for risk.

Each their own. 🍺👊

Having said this context is important here.We got not so normal conditions pairs over stretched way higher and lower then normal and going little higher risk to maximize best return of the situation is basically what I was trying to convey.

let me put it another way. If I had 5k account I am not going to waste an entire year to double that account to 10k.Yes its safer but not what I am shooting for.

Truly grateful to see your leadership skill Davit. Very refreshing and inspiring. True leadership is extremely rare but you are front and center leading us all on in the charge. In my opinion , you are 100% correct in stating that TIME is of the essence , seize these opportunities. Human learning encodes highly emotional events into our brains far greater than "regular events". I know that my own confidence level has been shaken but not shattered and my appetite for risk is nil compared to yours , but , that's okay I am willing to wait a little...

impressive post. I like your thought process and you have grown as a trader. Just one thing don't lose sight of charts as well. 🍷🍷

There is such a thing as over analyzing over thinking

Want to share something important US regulators imposed lot of restrictions on trading one of them now if your lots are same example 1 on multiple levels you can't place sL or close later ones.

One way to overcome this is by varying it slightly so no 2 trades are exact size example 5 55 56 57 etc this way you can maximize profits by taking TP green trade while waiting reds to turn green

Guys go easy on CAD or dont trade it.
Just read this news.Was not aware of this.Over night development.

Saudi Arabia escalated its oil price war with Russia on Tuesday, with its state-owned company pledging to supply a record 12.3 million barrels a day next month, a massive production hike to flood the market. The output hike -- more than 25% up on the previous month --

Could be threatening Russians for a deal? Dont think threatening works on Russians...
Crude is holding so far but can change.

The correlation Crude to Canadian economy is little exaggerated having less then 10% of overall GDP

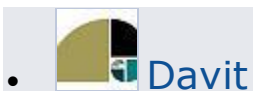

Thought to throw this out

Fun fact Untied Arab Emirates Dubai most known big city is only 2% of GDP but Saudis is 50% domestic and 70% export revenue.

So Saudis have lot to lose and maybe shooting themselves in the foot

This is why entire Gulf Arab countries and outside the Gulf marvel at Dubai growth.They managed to make a jewel of a city in the desert that does not rely on oil revenue!Its remarkable achievement considering awe inspiring architecture of Dubai

{quote} Unfortunately, US brokers are starting to take that option away. Some will still allow you to do this on their own trading platform, but not in MT4. But who feels comfortable using the broker's trading platform? I don't. The only solution I have to counter this is to use more than one MT4 account for the same broker. It's inconvenient, but it works. But it certainly doesn't work as effectively. Being a US trader has been a frustrating experience.

Yes and if Democrats win expect it to get worse increase of gains tax and maybe more regulation. I am jealous of our Canadian friends they can gamble online free and have looser trading rules.

I think US brokers lobby for these regulations. They want you to lose despite what they say publicly that they don't.

Russia says 'doors not closed' to cooperation with OPEC

[From business-standard.com](#)

Russian Energy Minister Alexander Novak said Tuesday that Moscow remains open to further cooperation with OPEC to stabilise the oil market. The lack of agreement with OPEC on extending production cuts "does not mean that in the future we can't cooperate with OPEC and non-OPEC countries". "If necessary we have various tools including reduction and increasing production," Novak said, adding that new agreements can be reached. "We have planned the next meetings in May or June to assess the situation on the market." Russia refused to agree to a proposal by OPEC ministers led by Saudi Arabia for a drastic cut of 1.5 ... What's funny my critics haters reading my every line I post here **diligently**

I figure If I dont like someone style of trading or whatever reason I simply dont read them. Simple as that.

Anyway every village has a barking dog.

Modest gains today but gains nevertheless building the account on fast pace track. Some examples since Spike on EA. Yes did take losses on EA spike and Yes do have DD on UC which is getting smaller and YES I am making money in the meantime! **That's what counts ability to rebound and succeed!**

Attached Image (click to enlarge)

Symbol	Trades	Buys	Sells	Lots	Buy Lots	Sell Lots	Profit	Loss	Nett P/L	Nett PIPs

Fed seen cutting interest rates to 0% soon in bid to help weather coronavirus storm

[From marketwatch.com](#)

To help the U.S. economy get through the coronavirus pandemic without too much damage, the Federal Reserve is expected to follow its new crisis playbook that calls on the central bank to be aggressive at the start of any possible economic downturn. Economists now see the Fed cutting its benchmark federal-funds interest rate to zero percent quickly. The Fed announced an emergency half percentage point cut in its policy interest rate on March 3, and is expected to lower interest rates again at its regular policy meeting next week. Michael Feroli, chief U.S. economist at JPMorgan Chase, thinks the Fed will cut to zero ... ([full story](#))

Hi Davit, I agree with the strategic pick on AN trying to stay safe away from huge volatility spikes. I'm long too with small position due to limited margin after the loss. Position is small also considering that after the double top between 4 and 5 of March trend for AN is clearly down with LL/LH since. {image}

Should bounce soon. Hang in there. I am on it
market is nervous buying anything other than USD. Should stocks rally a little it will help commodity pairs

Wall Street really needs something positive. Yesterday drops were brutal. Had to close 25% of UC positions as loss

Tough taking losses but comes with territory. If you don't want to be burn don't become a cook

You should never forget there is another side of the loss which is gain. Focus on gains making money. Worst thing to do is letting a loss

scar you.Hinder your trading

Remember its random distribution of losses and gain and with EDGE we have higher probability to have more winners.I really dont count recent crises of virus as regular event hence **should be dismissed as anomaly**.Not part of the system

Federal Reserve cuts rates to zero and launches massive \$700 billion quantitative easing program

[From cnbc.com](#)

“The Federal Reserve, saying “the coronavirus outbreak has harmed communities and disrupted economic activity in many countries, including the United States,” cut interest rates to zero on Sunday and launched a massive \$700 billion quantitative easing program to shelter the economy from the effects of the virus. Facing highly disrupted financial markets, the Fed also slashed the rate of emergency lending at the discount window for banks by 125 bps to 0.25%, and lengthened the term of loans to 90 days. The Fed also cut reserve requirement ratios for thousands of banks to zero. In addition, in a global coordinated ... [\(full story\)](#)

short EG

its the right time

Goes without saying I could be wrong. Market can do anything but its great set up. should dive under 90 very soon

USD still dominates but its getting pretty extreme at this point.

Closed losses on UC

Weak oil demand plus Saudis going all out pumping more exasperates the situation. Not touching the CAD could go 145 2015 highs

I suggest shifting your trades to None USD pairs. Crosses are safer/Right now USD dominance is on panic level.

Can anyone explain why the USD is getting so strong? I don't get it. MM's?

least risky I guess stocks tanking oil tanking bitcoin tanking USD seems most "safe" at least until it gets pushed beyond sustainability. Seriously how long UC is going to stay above 1.40? Week most. It will crash fast.

Only difficulty is not knowing how long panic mode is on. Could last longer then we think since this is 1st time market is dealing with this in recent times.

That being said if you sustained losses like most people learn from it and move on. Don't beat yourself for it.

Money can be earned back. What you have is skill sets that always yours!

Do think MM big banks are killing it. They can move it at will. Logic or no logic.

Lot of pairs are respecting key pivots

GU bounced from S61

EU touched S61 then bounced North

AU little lower then S61

EG right on the R61

Pivot principles still strong that's why I am confident we are going to make money lots of it. I want to share what I've been working on as filter. Will monitor trades for two weeks but so far happy with it. Idea is to focus daily weekly and closed all trades by Friday. Even though I have been anti MA reality is there is nothing else that I like.

Dashboards are based on MA's so why not use it what it is.

I am using 8EMA and 21 played with other settings but this combo works best 15 30 min chart that's where my focus is. Don't like Oscillators because it gives you faulty sense of the market. Oscillator OB OS is all shit. For that thank God we got Pivots!

I suggest when price reaches key pivot zone wait until it clears 15-30min MA's down or UP. It's a good filter. Must clear 21MA this way gives you a pause.

It looks like Strat set up but it's not. I am using faster settings with Pivots. Like I said before nothing new in trading we are just combining ideas.

I think this partially will solve getting in early.

15 min is my preference chart and signals from it but 30min works as well but little late may lose some pips but also may keep you away from getting in early on losers.

You don't have to have my chart with MA's but I think it's good addition. I need something visual to make decisions since I am visual person.

Rest are same indicators as regular Pivot. Drop my template and you are good to go. Don't like my colors please have fun change it to your liking although I spend great deal of time harmonizing entire chart to look stunning.

Look how nicely it prevented to take a loser on UC. Even though its at 100R PA and price did not clear 21 MA

You did not take the potential loser. **That's the whole idea eliminating early trades.**

This is nothing new but its effective.

{quote} Hi Romanov102, this I know. My question is why we use the 8 period ema if we look for ma 21 clearing.

What is Exponential Moving Average - EMA?

An exponential moving average (EMA) is a type of [moving average](#) (MA) that places a greater weight and significance on the most recent data points. The exponential moving average is also referred to as the exponentially [weighted](#) moving average. An exponentially weighted moving average reacts more significantly to recent price changes than a [simple moving average](#) (SMA), which applies an equal weight to all observations in the period.

EMA puts more weight at present data hence less lagging. There is fine balance we need lag to keep us away from early entry but not too much as miss a trade by wide margin. EMA suits the best. Think of 8EMA as yellow in traffic light and 21 as green or red. 8 is "heads up"

So If price is at R61 and 15 chart price crossed 8EMA heading to 21 I will be all eyes as possible trade option once cleared 21

Simple. Sure as always there will be losers but that's true on all systems.

I like how AN is closing nice.

{quote} I agree, Can't we then say wait for pivots to catch up with price then? Down the line the old pivots will catch the future pivots? According to the basics for the TDI, if price is above the 50 line it's an up trend? Just my thoughts.

At present panic situation obviously prices overrun on Pivots. Keep that in mind that at present it's hard making sense since fear is driving the markets. Fear is very powerful. I think personally positions should be smaller than normal now.

Don't have to tell you trade with extra caution or not at all. Everything is at extreme and it's real panic selling cross the board including stocks Dow touched below 20 and maybe heading lower.

No system can predict next move. It's worse than I imagined. **Stay safe** hunkering down until it blows over.

Feds maybe have to go negative rate to deflate weaken the USD. Emerging markets on verge of collapse. Extremely strong USD is global issue now.

Unless Feds want to see Turkey Chili Brazil Argentina Australia New Zealand South East Asian countries totally collapse not to mention Canada.

Something must yield to normalcy.

Crude almost 22

Very bad news for US producers. Thanks to Saudis our weapons purchasers fking everyone by dumping it on the market with little demand. Drive US producers to bankruptcy then buy weapons from US....

Then kill bomb innocent people in Yemen with US purchased weapons. Something is terribly wrong here on human level.

How is that we sell weapons to Government who kills journalists prohibit building churches there limit women rights human rights kill innocent civilians by the thousands and starve kids in Yemen and we look another way as though none of these matters.

Sometimes I am ashamed being an American

Hey Friends,

Personally, I agree with the waiting to trade heavily as eventually world health organizations, markets and geopolitics will eventually correct - thanks to the brilliantly collective human minds that can help correct these issues by several means - eventually halting the greenhouse effect and global warming is possible with global cooperation and ingenuity.

Major medical technology companies are rushing to develop an effective vaccine i.e. using the genetically engineered rats with a human immune system to induce production of antibodies against this strain of Corona-virus and against the eventual new strains that follow thru viral mutations.

Already, there is a second strain of the Corona-virus that is being closely monitored to see if it behaves differently or not.

Unlike the other flu strains over recent years, the Corona-virus attacks the lung tissues and thus can be deadlier in the elderly and others with weakened immune systems that can cause a greater chance of serious illness and even death.

Please read The CDC Website on the Coronavirus or Covid-19 ASAP to help You, your Family Friends, Community and perhaps Our World NOW at:

<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

For now, it is about following medical guidelines of hand-washing, a 2 week social isolation, avoiding enclosed areas like plane flights,

restaurants, staying 6 feet from others, etc.

Now, if a large meteor hits earth as it did some 256 million years ago, then I would worry that there would be no market left to trade Forex !

Seriously, please beware and actually take the health guidelines seriously to help halt the further spread his dangerous virus - as not to kill half of us as the Black Plague did only 650 years ago in Europe - nothing compared to the 200,000 years of our existence as modern man and the multiple catastrophes that may have wipe us out several times over the hundreds of thousands of years we walk this earth.

All this will corrected eventually through rational understanding and mutual respect in order to have effective world cooperation and putting aside politics in to order this fight deadly threat.

The CDC in Atlanta, Georgia, some 50 minutes from my home, and across the street from Emory University. The Center For Disease Control is aggressively gathering formation with the other world medical scientists and health organizations to find solutions for this serious human threat.

Stay safe with being cautiously optimistic.

Do not panic - instead, using sound reason to help you and your loved ones.

We will survive as we have for some 200,000 years !

Again, please see The CDC website on Covid-19 at:
<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

Cheers my FF Pivoteering friends !

Yours,
John

I'd like to share my reflections trading weekly pivots on the last period and and listen to your comments. Weekly Pivot strategy has worked well for me in the last two years. In the latest months I suffered big losses making me doubt the strategy in itself. I've come to the conclusion

that the strategy works very well when in the markets there is a "normal" volatility and conditions. In exceptional periods like this one when there's no mean reversion at all for a prolonged time, when we see 600-700 pips candles on H4 TF for EA and more than 1,000...

Agree with you however some pairs Pivots still respected. Like EC

I was not mentally prepared for this situation and I think lot of people as well. 1st market down played it nothing "dangerous" then politicians and market went full tilt hyper panic "dangerous" by then I lost good chunk of the account. Not going to beat myself forgive yourself and learn from it and move on.

Anyone who traded for real has had losses. Trust your skills to get all back and more.
cheers

Trading is much like playing guitar. Once you know the chords its hard unlearning them. **Trust that you can still play!**

Good morning guys. Feeling lot better.

Noticed whenever UC drops AN goes up. There is correlation I just never actually watched this in play like I do now. That being said 142-140 UC will be roughly 300-400 AN

How unusual is it? Well EA went up 975 in 1 day and dropped even more next
Basically cleared all stops on top and below

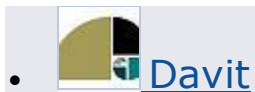

Its truly spectacular

Guys who trade with weekly candles would of got slaughtered sort of "top down analyses"
Times like this there is no real "top down analyses"

real danger here is US economy. After massive stock sell off and cheap crude and people basically doing nothing traveling nowhere Hotel food

restaurant Travel construction energy and many other sectors will get hit hard that may not be able reopen.

How do you keep paying rent for business without customers for months? Impossible. Sadly we are going to see lot of bankruptcies. I just hope we come up with vaccine lot quicker or world is real danger as we know it.

Even if you make 500 a week from trading that's still great considering there are no jobs now. Trading now is my only lifeline

Hence if I make 5-6k from UC that would pay lot of bills mortgage etc. No time to dwell on losses that's the past.

I smoked pot last night to relax. Do what you need to calm your nerves you need to get over the fear of losing.

Meditate walk exercise do what works for you **its critical you are relaxed.**

Don't need experts to conclude under these conditions recession is certainty
Same you dont need scientists to say drunken person is likely to fall 🍷🍷

Attached Image (click to enlarge)

Corona virus is shrinking economy

From seco.admin.ch

Economic forecast by the federal expert group - spring 2020 - the expert group expects Switzerland to fall into recession in 2020. The spread of the new corona virus at home and abroad temporarily shuts down parts of the economy. Provided that the epidemiological situation stabilizes, the economy should gradually recover from the second half of the year. In this case, GDP growth would be high in 2021, but it would still not be possible to achieve the previously expected level of GDP. The forecasting uncertainty is currently exceptionally high. The expert group of the federal government forecasts a drop in GDP ... [\(full story\)](#)

Want to throw this out

If you got no fever and staying indoors home good chance you dont have the virus so relax.
High fever followed by dry cough signs of Covid 19

If you got runny nose chances are you got regular cold. Interesting that Covid 19 symptoms rarely include runny nose.

Crude just shot high reaction on CAD is mute so far

sick of panic USD buying! Would not mind this plummet to 2008 lows after the crash. Its possible now they predict 80% chance of recession

USD is like Anaconda squeezing life force out of the countries

{quote} I'm interested to learn something new to your trading style. Maybe this will help us too with entering trades too early. I'm looking for a way to help me fine tune my entries.

Its simple 15 chart (my go to TF) conservative 30min Price in the zone look and wait until price drops below or above MA's short or long. No need 20 traffic lights and oscillators. Simplicity is powerful.

Combine it with awareness of events and you are good to go.

AJ even though price is in the zone its going down. You must wait. Price below MA's
Although at 100s was good trade going up.
UC and AN holding my funds. Can't take trades until I close these in profit. Yes I see lots of great set ups but can't take them.

Maybe Deltaone can give me 50k to trade as good will 😊 after all its peanuts to him. How about it **since you read my every word action movement** might as well invest on me.

Power of fib pivots work on all time frames. My preferred setup of late period markups/markdowns work surprisingly well. Been taking advantage of the volatility with indexes. Banked another \$1k in little over an hours time. 5m candle on the 4H pivots. Late period technique mentioned here: <https://www.forexfactory.com/showthr...6#post12489736> {image} {image}

Great job Darrin! Times like this every \$ counts! 🍷👊🌿💰

+1800pips on UC so far 🚴🚴🚴🚴🚴🚴

Its funny how things change in FX last week Italy locked down and panic everywhere and EN EA shoot thousands of Pips north.
Today Euro is like hot potato nobody is touching it.
Maybe both EN EA were the trades of the decade shorting from the top. 15k pips south in days
Easier said after since nobody would of thought such high numbers to reach even for limit orders

Keep in mind Virus cases are dropping in China and any good news should bolster AUD so I am not worried on AN long. Next week we may see thrust to 200+

I said EG should drop below 90 14hrs ago its almost there. Only reason I didn't trade as much as I would of liked because of margin requirement is huge compare to EU so I hit EU more often

Below UC 🍷💰 at 35 out account should be nice n healthy

Here's a good video from Nick on today's current trading situation. <https://www.youtube.com/watch?v=7Yxn...ature=youtu.be>

Thanks Nick for the video

To sum up dont trade daily candles, dont hold trades over the weekend.

I trade 15min anyway and right now have UC in profit and let it ride and AN very close to become profitable.Nothing else.No Yen

Agree times like this its highly volatile market you only need to look EN EA spikes in thousands.Pretty scary looking candles.

Another tip.

Keep your account same meaning if its 10k

Any profits made take out keep 10k

unless you want to increase the account then fine but taking money out regularly is good practice. Emmanuel had this post about lotto account.What it is basically after reaching your invested capital take your start up money out then you are just trading with house money.

I like this idea.

cheers

I had incredible 14hr trading run last week.Made great money and realized one thing.I was happy taking my profits after 40-50 even 30pips out because of market conditions.Had I stayed example EU long I would of got crashed friday late dumping of it.

We adapt to market conditions!

Another observation.

Almost all my trades were based on new template 15min chart and worked beautifully.Gave me lots of confidence for next week.

Voty who likes old TDI cross (although I never traded TDI crosses on this thread) on UJ short

this turned out not so great.

Guys dont stray from principles here.Stay on course.There is solid reason why I don't like oscillators.They skew reality and that we dont need.

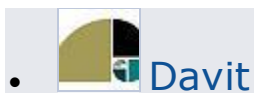

The system has involved to highest level I think.Its sharp on to the point.No wasted energy right on target.Its clear rational logical.

Took 59 trades in 14hrs all winners.Example below on EU
Above MA's and in the zone going with UP momentum. Had lots of EU made almost 900 on it.Notice late dumping of it.Glad was not trading daily candle or H4

{quote} Have to agree with your statement oscillator's. People rely on them as a signal, when the only true signal is current price level. Have seen a lot of people dive in on a oscillator cross, only to get dragged into a massive DD because of a divergence.

Agree. 🍷🍷

WE should be killing next week. EG GU look fantastic. I think GU likely to get pushed to 18+ Feds are going to weaken USD or it will get weaker naturally since impact of shutting down everything is going to take effect. We may experience another 2008 with QE running! at least 6months

Australia to Unleash A\$66 Billion in Second Stimulus Package

[From bnnbloomberg.ca](#)

Australia plans an additional A\$66 billion (\$38.2 billion) in stimulus for the coronavirus-stricken economy, including cash payments of as much as A\$100,000 to small businesses, in a second package aimed at averting recession and saving jobs. The plan, to be announced by Prime Minister Scott Morrison on Sunday, will provide A\$25.2 billion in support to businesses and not-for-profit charities. It will also partially guarantee loans to support A\$40 billion in lending to small and medium-sized firms. Further details of income support measures are also expected later Sunday. The new measures dwarf the government's ... ([full story](#))

[Quoting Romanov102](#)

{quote} Agreed, probably exponentially much higher.

On the other hand more people die of regular flu car accidents suicides alcohol cancer daily. 800k people die of suicides every year one every 40sec.....

88k Alcohol related in US alone every year.

Just for comparisons

When you look at mortality rate of Covid 19 is tame in contrast.Its usually dangerous if you already have other issues and older group otherwise recovery is great.

One thing you should not do is get paranoid.Anxiety is stress and stress is bad for everything

Great relaxing activity to do is draw.Seriously anyone can do it increases attention and Trading is all about attention.When you take time to actually look at the detail and shapes of an apple you see far more then just looking at it.Anyway do what you like!To relax

Could be playing an instrument

My point is when you come to trading time your mind should be relaxed and sharp.No anxiety of any kind.

No DD nothing! actually positive gain. Should get big quickly expecting UC to drop below 1.40 this week and AN 300+

Too bad GU opened way higher then I thought it might. EG push to 92 would be great spot to build shorts

Germany shut down much of Euro firepower is dead. EG should reach 89 this week

Its annoying dropping already!! Not gonna pay 15pips spread on it now.

AC should be on your watch list
84 could be reached this week or more
We are going to respect system rules so no haphazard entries.Wait for PA to show direction then
MA's below or above depending on direction.
15 min fast my preference 30min conservative but "safer"
I dont trade anything more then 30 min.With wild price swings during virus situation depending
on higher TF may lead you in deep DD as we witnessed on UJ last week.Classical TA of Daily 4hr
candle then H1 30 does not apply to conditions now.To me at least.You could have bull H4
followed by equally or greater Bear H4
Smart thing to do is 15min 30max get out at 30-50pips gain then either reload on dips or look
for another pair.

One tip on UJ

It tends not move much during beginning of the week then speed up Thurs Friday so dont park your margin on UJ tying up your funds now
You'll get frustrated seeing your money freeze up doing nothing.I hate that.

Anyone trading the USD/CAD , if we can get a close of 1.4390 on a 4 hour chart (2 hours from now) , the uptrend since the week's open for this pair has a very good chance of being broken. Don't know if it will happen today , but , this is a critical level to cross below. Opportunities are everywhere in this market. GE

Hold on and relax.Thurs Unemployment Claims should reach in millions then you'll see greatest USD fall

{quote} Davit , I totally agree. You have forgotten more than I will ever know. I have a question : Do you think that the market has already "said" that it's a forgone conclusion that Employment numbers will be horrendous and thus already priced in ? I'm wondering if the Saudi's and Russia are realizing that they cannot sustain these low oil prices. Who knows , they may have been bluffing as well as intentionally manipulating the oil market. Canada could supply the entire US with Canadian Oil , but , not at the prices that the US has been paying...

I dont have the answers but do know **UC above 140. is unsustainable number.** Could drop below this week or next but its going to drop.

If you are tempted to short EC now well dont.Signal is weak and may go north good amount before heading south.
System is idiot proof.Just follow it and you wont find yourself in unnecessary DD or losses that could of been avoided to begin with.

{quote} Hi davit do you close also when price touches 21 ema. For instance price broke the 21 ema before, through downside. And then upmove again. If we entered short when previous break, should we have closed the Position after counter move ? I mean if we sold before, had it been a wrong one?

not clear what you asking but its different market conditions now fast moves erratic often so taking TP is always good before price comes back eating all your profits. You notice I get out quicker now? Just adapting to market

Ma's are good for entries but exits should be judged on each trade bases

EC was a hyper spike by MM too fast MA's even to catch up. Not late to short IMO
I could be wrong anytime.
After gigantic spikes on EN EA I am basically stopped trading these pairs.Risk is too great during
Virus period
Its MM playground pairs.

Sure looks like the Fed is being run by a bunch of idiots. Printing to help the bond and stock markets doesn't do anything to support the economy 😞 <https://www.cnbc.com/2020/03/23/fed-...purchases.html>

dollar too strong. Its crashing emerging markets like Brazil Argentina South East Asia and ton of others. Need more USD to weaken it. Agree with Feds printing more.

Economy can only improve once people go back to work however granted if companies still thereIf not supported now they may not exist once this virus is over.

Here is a live example what you were trying to say. Yes as long as MA's above Price I hit it again short in this case EC larger swing is down.Will not do it cross the board

I think its core principle of Choros (dance)trading system but its risky.I only do it when I am confident with fundies and where pivots are.

Some traders only take second "wave" because they need "confirmation" **its flawed logic** but just sharing it.

My brain is wired based on probabilities and sound trading principles. Main swing is where the action was EC dropping from almost 58 to 56 is main thrust later you are experiencing the ripple effects.That can go opposite direction for good chunk so no such a thing as "confirmation" somehow think that terminology is antithesis to trading.**Nothing in trading is certain everything is probabilities.**

First trade of the day Dow opened after lock limit up. I bought after a few green candles. The Fed is swooping in and buying with the fake money they printed that's Hot off the press. Long from 19921.30 NO Limit just using a trailing stop. The dotted Turquoise cross is where it opened. {image}

I'm on dow as well.

I'd like to share my reflections trading weekly pivots on the last period and and listen to your comments. Weekly Pivot strategy has worked well for me in the last two years. In the latest months I suffered big losses making me doubt the strategy in itself. I've come to the conclusion that the strategy works very well when in the markets there is a "normal" volatility and conditions. In exceptional periods like this one when there's no mean reversion at all for a prolonged time, when we see 600-700 pips candles on H4 TF for EA and more than 1,000...

You should be in nice profits on AN if still holding.I got out yesterday.

Hi Davit,

keeping into account the extreme volatility of the markets I exited on 20.03 for a decent profit.

I don't like this pair and more in general I'm trying to adapt my trading to recent fast market conditions holding positions for a less time.

Currently short on UC, EC, long on CJ and considering to short UJ if eventually USD will weaken.

Porta itineris dicitur longissima esse

Interesting to see what happens when unemployment is at 1.500K. Fasten your seat belt.

And this will be just the beginning of the recession!!!

AUD NZD running out of steam

Be Cognizant of daily open. That gives you ton of info. How far it traveled what direction how much retraced and often becomes support and resistance

You might be impressed with my results but its hard work. Slept 3hrs kept waking up for important events watching numbers while in bed even basically **full 110% commitment to succeed**. If you think you are going relax press buttons and walk away its not going to work specially if you can't focus and pay attention to price.

Success has price. In anything

Week plan

Buy GU EU on corrections.Hit crosses left and right where trades are valid.

GU drop to 1700 is solid level for long.This will reach 20+ soon and more/ EU 700 give or take good level to buy

Above my trading plan for the week and I have executed accordingly. As you can see from results of the day and day before.Sold Euro on crosses and bought GBP but going long EU on the cards just have not seen the number I like yet.

Be careful shorting EU GU or rest of majors Feds are printing Dollars should weaken USD specially after massive

unemployment number coming out Thurs
Basically entire country almost all employees got laid off.

Going to much needed sleep. Stay green!

Closed more UJ

This is a trade that I gave heads up. Not the best set up but money is money.

Ideally I like my stats to end 5pm for the day but it ends at midnight so going with it. UP over 2k for the day.

Nice drop on UC

Should everything go well I'll recover very good portion of my loss during virus crises in very short period. That's the goal

Spike did not erase your skills as traders! It's part of you. Once a trader always a trader at least real ones.

Good chance GU retrace back to 1680 area great spot to build solid longs. WP is a place to watch for correction.

I don't think at this point correction will go deep.

check out WP

GC shows no weakness on bear side so I anticipate it reaching R68

Great opportunities lately

Took EC this evening in nice profit but with UC falling I am letting this ride more

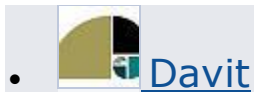

Little feeling disappointed I dont see others posting their trades.Either not taking the trades or just not trading.Puzzling

Asia lost steam. Will have to wait London to show direction. I would love to see GU EU get beaten down so we can load up longs

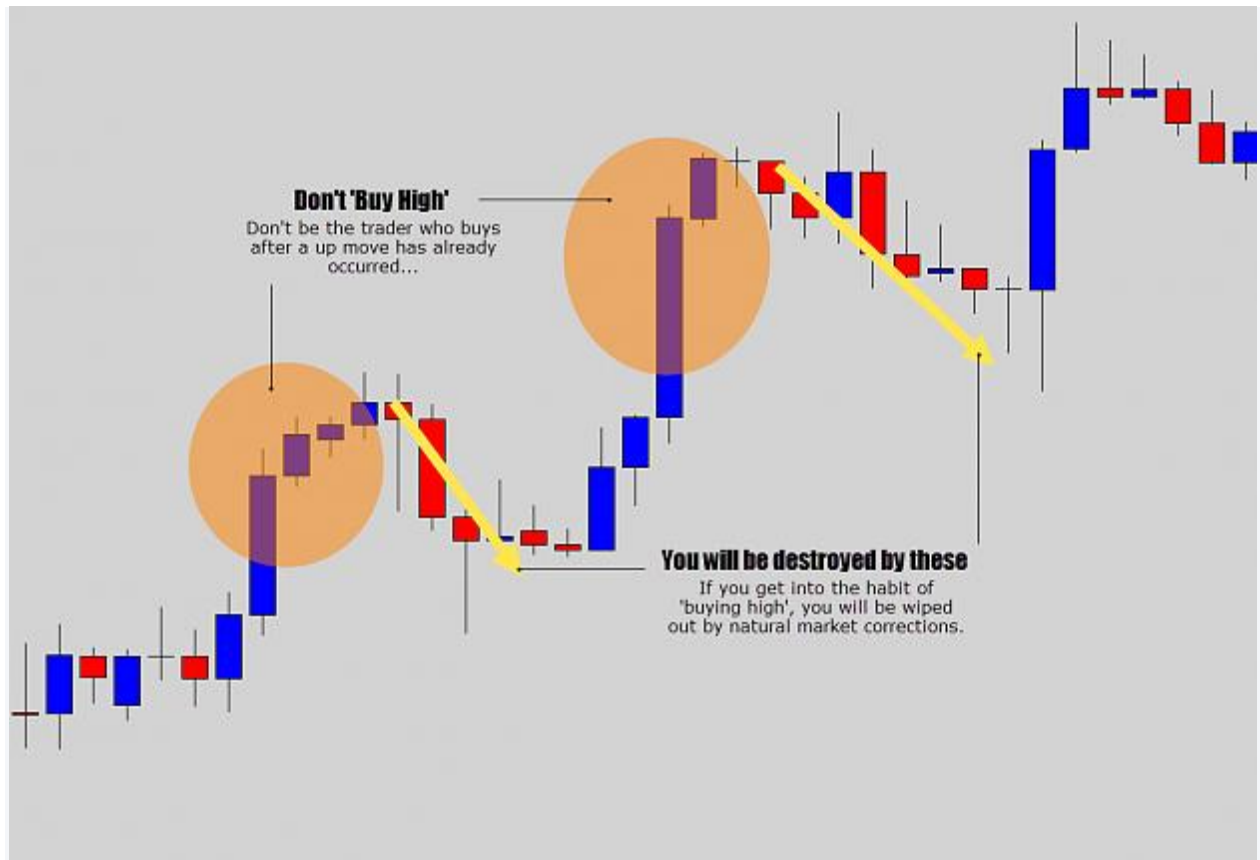

I never like buying at the end of the moves always on dips and rallies if selling

<https://www.forexfactory.com/showthr...3#post12164703>

Below is trading 101 but trust me even after 10yrs there are still people doing these rookie mistakes

Trading should become automatic like playing a guitar but with sound principles. Once learned becomes part of you and hard to unlearn.
