

## Course Contents/Plan

This document outlines the contents of the course for this system. Basically it would include three sections namely; **Theoretical Reading** (which would include a pdf. document dedicated to the system and recommended reading of some online materials), **Question & Answer Sessions** (to be organised on Skype) and **Practical Trading Sessions** (also on Skype).

The **Q&A** session would be available only during the evening 3 days (yet to be agreed on) during the weekdays and on Saturdays. I plan on having a 1-hour session evenings during the weekdays **from 7-8pm BST** and a 3-hour session from **10am-1pm BST** on Saturdays. If any member wishes to arrange for extra sessions, these would be available at no extra cost as long as I am notified well ahead and the time suits my plan.

The **PT** session would be available between **9:45pm and 10:15pm BST** every day except on Saturday evenings. I therefore would advise using a broker whose daily candle opens at **10:00pm BST** every day for correlation purposes.
